Upcoming construction for retaining wall replacement with lane closure

Northbound Volunteer Parkway between English Street and Hill Street/Holston Avenue

Please be advised that the Tennessee Department of Transportation (TDOT) will soon begin construction along the northbound lanes of Volunteer Parkway between the English Street and Hill Street/Holston Avenue intersections, located south of downtown Bristol. This construction work is to replace a retaining wall along the west bank of Beaver Creek.

Starting about the last week of April, TDOT will begin the actual construction work at this site, which will require closing the northbound right lane of Volunteer Parkway in this area. Access will be maintained to all adjacent businesses and properties, and to the Wes Davis Greenway across the creek. The project is scheduled to be completed by June 15, 2018.

Questions should be directed to David Metzger, Traffic Engineer, at (423) 989-5522 or at dmetzger@bristoltn.org.
