Triad Packaging to remain in Bristol

Expansion and additional jobs to follow

One of America's largest corrugated packaging companies and the world's largest, privately-held 100% recycled paper and packaging companies, Pratt Industries has purchased the locally owned Triad Packaging, Design and Display Company. Triad Packaging is located on Industrial Drive and currently employs 55 people. The Georgia-based company has decided to maintain operations in Bristol with a planned expansion of approximately 45,000 square feet and hiring an estimated 10 additional employees. The expansion represents a \$2.0 million dollar investment. Locally owned J.A. Street and Associates were awarded the construction contract as Tri-Summit Bank provided financing. "We were thrilled that Pratt Industries affirmed its commitment to the City of Bristol and is announcing its plan to expand while hiring 10 additional employees," said Shari Brown, Director of Economic and Community Development. "It is always gratifying to be able to retain businesses and jobs."

Pratt Industries has facilities in Conyers, Georgia, New York City, and Shreveport, Louisiana with more than 4,000 employees. The company is known for its dedication to the sustainability of the environment.
