Form Completion Notes

The general contractor (permit holder) is responsible for completion of this form and submitting it to the City of Bristol Code Enforcement Division.

All information must be completed. Incomplete forms will not be accepted.

A contractor or subcontractor is not authorized to begin work until all information has been verified and approved.

The work of contractors or subcontractors not on the approved listing will not be inspected and work may be stopped on the project if they begin work prior to approval.

If a contractor is a sole proprietor, does not have employees, and does not have worker's compensation insurance, he must provide a copy of his exemption certificate from the State of Tennessee.

A permit may be issued with known subcontractors prior to the full list being submitted. It is the responsibility of the permit holder to keep this list current at all times during the course of the construction. This list should be displayed in a prominent location on the job site.
Code Enforcement Inspectors will ask for a copy of this listing if it is not visible prior to conducting inspections
