

HOW TO MAKE A MINI CITY OUT OF PAPER ROLLS

Help Kids Be Creative

- 1) Paint toilet & paper towel rolls in a variety of colors.
- 2) Cut rectangles out of construction paper and fold them in half to create roofs. Now put designs on roofs with colored markers.
- 3) Draw doors on construction paper, cut them out & glue to rolls. Cut the rolls so doors will open. Use patterned papers for the windows.
- 4) Attach tape to insides of rolls (sticky sides out) & affix roofs.
- 5) Cut squares of construction paper that will be used as signs for your building. Write on the signs what each building is e.g. bank, dinner, etc.
